

Semester evaluations, Study Board for Cross-Cultural Studies (CCG
and Tourism),
Spring 2018 September 2018

Tourism-Aalborg

13 students filled out the survey giving a response rate on 39%. Of these 10 were 8. semester students and 3 10. Semester students. It makes it difficult to generalize with any validity. To make it worse many survey items are only answered by 6 students making it difficult to make any conclusions from these numbers. These items will not be commented in this evaluation overview.

However, looking at the number on time spend on studies show that a majority (86%) is spending between 30-40 or 40 hours or more on their studies. It has been a goal for the Study Board to maintain a high level of study activity. This is also the self-perception of the students where a total of 74% evaluate their own work efforts to be satisfactory.

Among the qualitative comments two students call for more opportunities to gain practical experiences.

The 2018 Evaluation of the Programme

This evaluation was answered only by 3 students which makes it impossible to generalize or even generate any findings from this sample.
